FEMINA

A quote says, 'Work hard in silence, let your success be your noise'.

I believed this strongly, when Proficient got a coverage in India's largest selling magazine **Femina**, in it's 'Education & Career' special issue (July 2019).

Education Focus

Rashmi Waghmode
Founder Director
 (Proficient Counselling Corp.)
 is also providing career guidance to working professionals and mothers who are planning to take up the career after a break.

 to know more details.

Personality Based Career

Yash, a state level badminton player was insistent to pursue his career only in sports after his 10th boards, however his mother had a suggestion to consider some serious academic career. But which career to choose was the question mark. They contacted Rashmi, in Proficient, to get the solution. Proficient Counselling Corp., run by Rashmi Waghmode, has a clear objective of providing Personalized career guidance to students. Career guidance is provided with the specially designed Personality Test, which is based on the psychometric research. Rashmi has a rich experience of 15 years in such kind of research and data analysis. She is passionate about personality assessments and thus providing personality based career guidance.

Yash took the Personality Test as per her suggestion and that helped him in getting right career solution. Yash has thoughtful and creative Personality with a strength of rational and logical decision taking ability. After detail analysis of his report, Rashmi gave him 5 different personality based career suggestions, from which he chose the career in Mass Media, where the studies and career both are enjoyable for him. His Mother Chaitrali said, "It was a too good experience which gave us clarity to decide about our future. Rashmi Waghmode is an excellent counsellor and a guide. I recommend that people should go for it. Thanks Rashmi."

Rashmi believes that every individual has unique personality and can excel in career, only if the chosen career utilises his inherent skill sets. She insists upon taking such guidance as early as in 9th or 10th standards. She says, 'Children can eliminate rat-race. Personalized guidance gives an early career focus to students by reducing panic or tensed situations amongst them & their parents after 12th boards. Parents can thus take care of monetary preparations for planned entrance exams and admissions in chosen universities, while students can focus on studies.'
